PROFILE

Experienced mobile app developer with a demonstrated history of working in the information technology and services industry and I have keen interest in utilising, implementing, and leveraging the latest and trending technology tools. Having a unique and inventive approach to solving problems.

Capable of working both alone and in teams and incorporating feedback into the projects.

WORK EXPERIENCE

Flutter Developer Intern

Stackmod Innovations

2024 Feb - 2024 Jul

PROJECTS

- E-commerce App — Shop Easy, Developed 'Shop Easy', a flutter application utilizing provider for state management and SQLite for data storage. Shop Easy enables users to add, remove and mark items as purchased in shopping list, with seamless synchronization between sessions. APK file https://drive.google.com/drive/folders/1KL-2JRQCXTWxpRjgRURD21hUwyeCXUoV?usp=drive_link
- Weather Application — ClimaMate, Developed 'ClimaMate', a weather app allowing users to search by city for current weather details via an API and retrieve five day forecasts from another API. APK file https://drive.google.com/drive/folders/1pVW813Wq0PLd1gu6LpZNJJB9GAR7jNOZ?usp=drive_link
- Library Management System — Books World, 'Books World' is a comprehensive library management system designed to manage the catalog of a library with efficiency and precision. This flutter application utilizing Rest APIs for storing, retrieving, updating and deleting data.

Dotnet Framework Intern

iCore Pioneer Business Solution

2023

- Developed UI components with HTML and CSS cross-browser compatibility and responsiveness.
- Translated wireframes into interactive prototypes, collaborated with designers, and maintained design fidelity.
- Used CSS for visual enhancements and adhered to design guidelines and brand standards.
- Created fluid layouts with Bootstrap for optimal user experience on various devices.
- Collaborated with cross-functional teams, communicated progress, and sought feedback for improvement.
